

Introducing mentor by edriving®

First 'Closed Loop' Smart Phone Telematics Solution with FICO® Safe Driving Score

RISK REDUCTION REDEFINED

eDriving's new **Mentor®** smart phone solution for both iOS and Android revolutionizes driver safety telematics with two significant industry advances:

- The introduction of closed-loop training and coaching that responds to drivers' behaviors; **Mentor** telematics transforms big data into actionable personal insights.
- eDriving's partnership with predictive analytics and data science pioneer, FICO®, will result in the development of a transformational industry standard risk predictor – the FICO® Safe Driving Score.

Both of these advances provide invaluable benefits for drivers, as well as organizations operating both large and small fleets, resulting in safer drivers, safer roads and reduced TCO (Total Cost of Ownership).

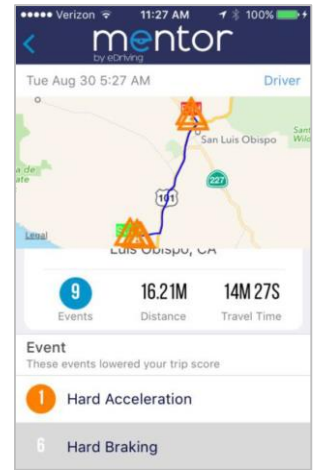

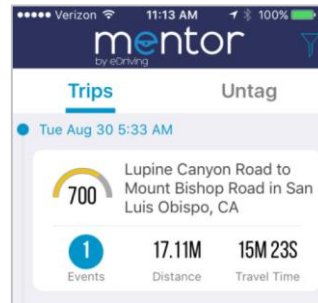

PERSONAL INSIGHTS

Mentor's powerful analytics engine fuels its comprehensive data collection processes and provides the backbone for dashboard views and benchmark reporting.

Mentor:

- Monitors and reports on risky behaviors, including distracted driving (text or phone usage while driving), speed, hard braking, and acceleration.
- Delivers immediate trip level feedback - daily, weekly and monthly trends / benchmark.
- Provides timely reporting to drivers and their managers.

- Calculates a FICO® Safe Driving Score based on the driving behavior inputs that predict driver performance, risk, and on-road safety performance.

- Integrates telematics data with other driver performance data*, such as license check data (MVR), incident and collision history, and engagement with training modules.
- Monitors fleet vehicle health,** miles driven, and trip details.
- Reinforces and rewards defensive driving behaviors.
- Provides engaging contextual coaching activities based on specific driving behavior.

* Requires VRM Implementation

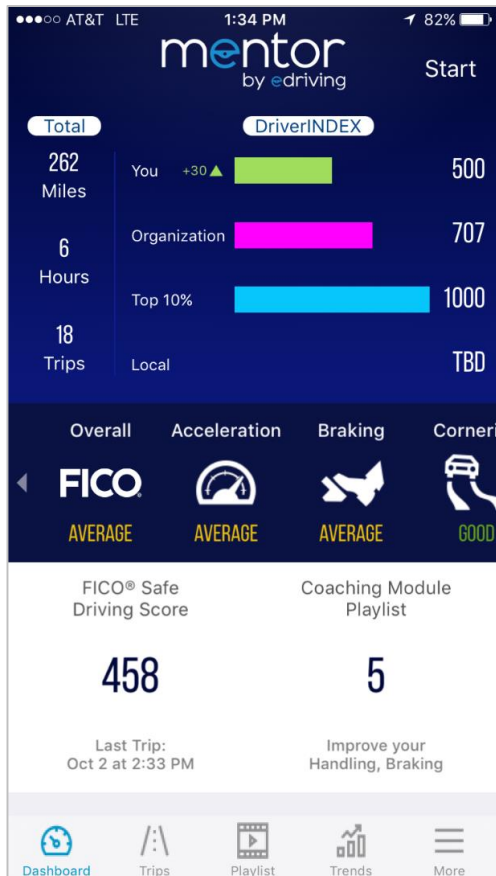

**Vehicle dependent

Drivers make more than 200 decisions during every mile driven. Mentor helps make sure they are the RIGHT decisions.

GROUNDBREAKING FICO® SAFE DRIVING SCORE

The creation of the FICO® Safe Driving Score is the first step en route to standardizing the measurement of driver performance and risk. eDriving and FICO will work with key industry players, including insurance companies and regulators, brokers, fleet and accident management companies, other telematics service providers, and car manufacturers to develop the FICO® Safe Driving Score into a powerful, ubiquitous industry standard.

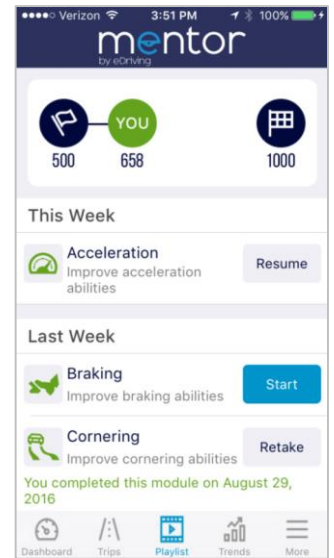

The goal is to use this score to empower 'good' drivers to prove their low-risk profile, and 'high-risk' drivers to understand their risk exposures, how those factors affect their safety, and what they can do to mitigate their risk of collisions. Ultimately, the score, in conjunction with the coaching provided within Mentor, can be a powerful tool to help at-risk drivers better control their actions behind the wheel, as well as their insurance costs.

FROM “WHAT” TO “SO WHAT?”

Mentor’s robust analytics engine is at the core of its innovative “closed loop solution”, which provides drivers with a personal driving coach 24/7 to help them manage their “at-risk” behaviors and change their unsafe habits to safer habits BEFORE they can get drivers into trouble.

Mentor provides a “playlist” of engaging interactive training interventions customized for each driver based on his or her on-road performance. It is this “closed loop” of activity that will help drivers identify and reduce risk exposures and change driving habits. In addition, Mentor-certified eDriving Coaches, from eDriving’s Behind the Wheel Training Division, can provide an additional level of feedback, tips and support via live calls.

WHY eDRIVING?

- 💡 25 years of experience
- 📊 6 validation studies, over 60 published research papers
- 🚗 Over 1,000,000 fleet drivers served
- 🌍 45 languages, 90 countries
- 🔧 67% reduction in collisions and incidents
- 🏆 Over 70 client and partner awards
- 💰 20%-40% proven ROI
- 🌐 The choice of industry leaders worldwide

- Unmatched breadth and depth of fleet solutions.
- Innovation fueled by drive, creativity & industry knowledge
- Partnering approach to all client relationships
- Unmatched passion for road safety
